Product Description:

Product Overview: Life Cycle Figure Model

This Life Cycle Figure Model is a highly realistic and educational product that is perfect for children aged 3 years and up. Made in China, this model is designed to help children understand the human body and its various stages of development while also encouraging creative play.

Features:

Realistic Design: The Life Cycle Figure Model is designed to accurately represent the human body, from the shape and proportions to the different limbs and organs. This attention to detail makes it a great teaching tool for children.

Movable Limbs: The limbs of this model are fully movable, allowing children to explore and understand the different movements and functions of the human body. This feature also adds an element of fun to the learning experience.

Educational: The Life Cycle Figure Model is not just a toy, but a valuable educational tool. It can be used to teach children about the different stages of life and how the body changes and grows over time.

Care Instructions:

To keep this model in pristine condition, simply wipe it clean with a damp cloth. This will help remove any dirt or dust that may accumulate during playtime, ensuring that the model remains realistic and visually appealing.

Country of Origin: China

This Life Cycle Figure Model is proudly made in China, a country known for its quality manufacturing and attention to detail. By purchasing this product, you are supporting the Chinese economy and promoting their craftsmanship.

Recommended Age: 3 Years and Up

This model is recommended for children aged 3 years and up. At this age, children are developing their fine motor skills and are curious about the world around them. This model provides the perfect opportunity for them to learn and play at the same time.

Size: 12 Inches

Measuring at 12 inches, this Life Cycle Figure Model is the perfect size for children to hold and play with. It is also small enough to be easily stored when not in use, making it a convenient and practical toy for both children and parents.

Other Uses:

While this model is primarily designed for educational purposes, it can also be used for other purposes such as a Human Body Torso Model in medical schools or an Architectural Site Model for urban planning. Its realistic design and movable limbs make it a versatile tool for various industries, including Industrial Scale Models for engineering projects.

In conclusion, the Life Cycle Figure Model is a highly versatile and educational product that is perfect for children aged 3 years and up. Its realistic design, movable limbs, and various uses make it a valuable addition to any child's toy collection.

Applications:

Welcome to Life Cycle Figure Model!

Our brand, Custom, offers a wide variety of highly detailed and realistic models for educational and decorative purposes. Our Life Cycle Figure Model is one of our best-selling products, loved by students, teachers, and professionals alike.

Application

Our Life Cycle Figure Model can be used in various settings, including:

Science classrooms and labs

Medical offices and hospitals

Art studios and galleries

Architecture and landscape design firms

Home decor and display

Scenario

Imagine you are a biology teacher preparing for a lesson on the human life cycle. You want to engage your students and make the lesson more interactive. You decide to use our Life Cycle Figure Model to demonstrate the different stages of human development.

As you introduce the model, your students are immediately drawn to its realistic design and movable limbs. You use the model to explain the stages of fertilization, pregnancy, and birth, and your students are able to visualize and understand the process better.

Next, you move on to the different stages of childhood, adolescence, adulthood, and old age. With the help of our Life Cycle Figure Model, your students are able to see and touch the changes in the body and understand the importance of each stage in the cycle.

As a bonus, you also use the model to explain the effects of lifestyle choices and diseases on the human body at different stages of life. Your students are fascinated by the educational aspect of the model and actively participate in the discussion.

Product Description

Our Life Cycle Figure Model is a 12-inch anatomically correct representation of the human body, featuring a detailed skull model and a torso model. It is made in China and has been certified by CE and CCC, ensuring its quality and safety.

The model is made of high-quality materials and has a realistic design, making it perfect for educational and professional use. Its movable limbs allow you to demonstrate different body positions and postures, adding to its versatility.

The model is also great for studying anatomy and physiology, as well as for creating architectural and landscape designs. It is lightweight, weighing only 1 pound, and comes in a multi-color design, making it visually appealing and suitable for various settings.

Ordering and Delivery

Our minimum order quantity is negotiated, and we offer negotiable prices as well. We understand the importance of timely delivery, and therefore, we guarantee a delivery time of 5-15 days, depending on your location.

We accept payments through Western Union, T/T, and PayPal, providing convenience and security for our customers. We also provide care instructions for our model, recommending to wipe it clean with a damp cloth to maintain its quality and durability.

Thank you for choosing our Life Cycle Figure Model. We hope it will enhance your learning and teaching experience. For any inquiries or orders, please contact us at custom@lifecyclemode.com.
