Product Description

Product Description:

Life Cycle Figure Model

The Life Cycle Figure Model is a multifunctional product that serves as a teaching tool, collectible, and display. It is designed for children

Our Product

aged 3 years and up, providing an interactive learning experience about the human body and architectural structures.

Function

The Life Cycle Figure Model is primarily designed as a teaching tool for children to learn about the human body. It comes with a Human Body Torso Model, which can be opened to reveal the internal organs and their functions. This model also includes a Human Body Organs Model, where children can learn about the different organs and their locations in the body.

Aside from being a teaching tool, the Life Cycle Figure Model can also be used as a collectible. The detailed design and high-quality material make it a perfect addition to any collection. It can also serve as a display in classrooms, science museums, or even at home.

Recommended Age

The Life Cycle Figure Model is recommended for children aged 3 years and up. It is suitable for both boys and girls and can be used as a learning tool for individuals or in a group setting.

Weight

The Life Cycle Figure Model weighs 1 pound, making it lightweight and easy to handle for children.

Warranty

The Life Cycle Figure Model does not come with a warranty. However, we ensure that it is made with high-quality and durable materials for long-lasting use.

Material

The Life Cycle Figure Model is made of plastic, a sturdy and lightweight material that is safe for children to handle. It is also easy to clean, ensuring the model remains in good condition for years to come.
