Product Description

Product Description:

The multi-color design of the Life Cycle Figure Model is visually appealing to children, and it weighs only 1 pound, making it easy to carry and play with. One of the key features of this toy is its realistic design, which makes it a great tool for teaching children about different life cycle processes. Whether it's an Architectural Site Model, Human Body Organs Model, or Anatomy Skull Model, the Life Cycle Figure Model is a great educational tool for children to learn about different parts of life.

The movable limbs of the Life Cycle Figure Model add to its realistic design, allowing children to manipulate and move the toy to simulate different life cycle processes. This feature also helps to promote hand-eye coordination and fine motor skills in children. The toy's educational value is further enhanced by its ability to help children understand complex concepts in a fun and interactive way.

The Life Cycle Figure Model is a great toy for parents and teachers who are looking for an engaging and educational tool to teach children about different life cycle processes. It provides a hands-on learning experience that is both fun and effective. So, whether you're teaching about an Architectural Site Model, Human Body Organs Model, or Anatomy Skull Model, the Life Cycle Figure Model is a great addition to any classroom or playroom.

Applications:

The Life Cycle Figure Model is an excellent educational tool for teaching children about the human body organs from an early age. It is designed with a realistic look, featuring movable limbs and anatomically correct organs that help children understand the human body system.

This model is ideal for children aged 3 years and up and is perfect for use in schools, homes, and medical facilities. It is lightweight, weighing only 1 pound, and measures 12 inches in size, making it easy to carry around and store after use.

The Life Cycle Figure Model is an excellent resource for teaching about hair anatomy. It provides a detailed view of the hair and its structure, making it easy for children to understand how hair grows and develops.

The model is also ideal for teaching about the human body organs, including the respiratory system, digestive system, and circulatory system. It comes with a detailed guide that explains the functions of each organ, making it easy for children to understand how the different body systems work together.

Customers can enjoy negotiated minimum order quantities and prices, making it easy to purchase the Life Cycle Figure Model in bulk.

The delivery time is between 5-15 days, and customers can pay through Western Union, T/T, or PayPal.

In summary, the Life Cycle Figure Model by custom is an excellent educational tool that provides children with a better understanding of the human body organs and hair anatomy. It is lightweight, durable, and easy to use, making it the perfect addition to classrooms, homes, and medical facilities.
